Nominations to Begin for 1980 Arthur S. Flemming Awards

The nomination process for the 33rd annual Arthur S. Flemming Awards, one of the highest honors bestowed on employees of the federal government, is inaugurated this week with the distribution of official nomination forms to agency heads in Washington, D.C.

This prestigious award has been presented annually since 1948 to honor outstanding young individuals in the federal government. Ten separate awards are made, five in the scientific or technical fields, and five in the administrative or executive fields. Past award recipients include such well-known figures as Daniel P. Moynihan, John Chancellor and Neil Armstrong.

Any civilian or military employee of the Executive Branch of the United States government who does not reach his or her fortieth birthday before January 1, 1981 is eligible to be nominated. Employees of the Library of Congress, the General Accounting Office, the Administrative Office of the U.S. Courts, and the Botanic Gardens who meet the same age criteria are also eligible. Nominees may include employees in departmental headquarters, regional or field offices or military installations throughout the world. Nominees are evaluated on the basis of their accomplishments and community involvement.

(more)

DA QA/QC: 12/28/00. SY

The award recipients are chosen by a panel of distinguished judges. Last year's judges included Senator Paul Tsongas; Richard W. Velde, Chief Minority Counsel, Senate Judiciary Committee; Dan Parker, honorary chairman, Parker Pen Company; and D.C. Public Service Commission Chairwoman, Elizabeth H. Patterson. Last year's sponsors were BDM Corporation, Exxon Corporation, Metropolitan Life Insurance Company and Perpetual Federal Savings and Loan Association.

Winners of the 1980 awards will be announced in March, 1981.

The Arthur S. Flemming Awards are presented annually by the Downtown Jaycees of Washington, D.C.

1980

Thirty-Third Annual

Arthur S. Flemming

Awards

April 10, 1981

*"So very much of what we are to be as a Nation
— and what we are to achieve as a people —
depends upon the caliber and character of the
Federal career service. In no other endeavor can
you more directly serve our country's cause — or
the values on which we stand — than in the
public service."*

President Lyndon B. Johnson

The Downtown Jaycees
of Washington, D.C.

The Downtown Jaycees wish to extend their congratulations to the Honorees of these awards. We are proud to be the hosts of this program honoring such talented and dedicated persons in our Federal service. We feel we can say this not only for our own organization but also for the other 320,000 Jaycees in 7200 Chapters throughout the United States. "... Service to Humanity is the Best Work of Life." reads the last line of our Creed — a Creed which is endorsed not only by the U.S. Jaycees, but by Jaycees in over 80 countries around the world. The Downtown Jaycees is an organization of young men and women from 18-35 years of age. We run the Cherry Blossom Parade, Orphans' Shopping Tour, Soap Box Derby, handicapped childrens' events, and 30-40 additional projects of varying sizes every year.

Arthur Sherwood Flemming

Dr. Arthur Flemming's career in and out of federal service is truly exemplary of the purposes set forth for granting these awards named in his honor. He served as a member of the first and second Hoover Commissions on Organization of the Executive Branch of Government, 1947-49 and 1953-55; President Eisenhower's Advisory Committee on Government Organization, 1953-61; International Civil Service Advisory Board, 1950-64; National Advisory Committee of the Peace Corps, 1961-68; President's Committee on Labor-Management Policy, 1965-68. While performing these services, Dr. Flemming was serving as the President for Ohio Wesleyan University, 1948-53 and 1957-58; University of Oregon, 1961-68; and Macalester College, 1968-71. He also rendered service as a member of the U.S. Civil Service Commission,

1939-48 and the War Manpower Commission where he was chairman of the Labor-Management Manpower Policy Committee, 1942-45. As Director of the Office of Defense Mobilization, 1953-57, Dr. Flemming served as a member of the National Security Council and by invitation of the President participated in meetings of the Cabinet. He was president of a variety of organizations including the Oregon Council of Churches, 1964-69; National Council on Social Welfare, 1968-69; and the American Council on Education, 1969-70. From 1958-61 he served as Secretary of the Department of Health, Education and Welfare. And from 1973-78 he served as the U.S. Commissioner on Aging. At the present time Dr. Flemming is serving as the Chairman, U.S. Commission on Civil Rights.

Statement of Purpose

The purpose of honoring outstanding individuals in the Federal Government each year is fourfold: (1) to recognize those who have performed outstanding and meritorious work for the Federal Government; (2) to attract outstanding persons to the Federal Government; (3) to encourage high standards of performance in the Federal service; and (4) to enhance appreciation of our form of government and the opportunities and responsibilities that it presents.

Basis of Awards

The following general criteria are considered in evaluating nominations:

(a) **Specific Accomplishments.** A specific accomplishment, for which the nominee is primarily responsible, resulting in a material improvement in service, a substantial financial savings or significant social or technological progress. One or more nominees may be submitted if such nominees were equally responsible for the accomplishment.

(b) **General Accomplishment.** Outstanding executive, scientific or technical ability or outstanding performance evidenced by the nominee, even though such ability or performance is not necessarily connected with or related to a specific accomplishment or project.

(c) **Community Involvement.** Community activities in which the nominee has participated for the enhancement of the community at large.

Specific examples and details must support each nomination. Supporting data should be limited to facts, insofar as possible, rather than opinions or conclusions.

Eligibility of Nominees

Any male or female, civilian or military employee of the Executive Branch of the United States Government who did not reach his or her fortieth birthday before January 1, 1981, is eligible for nomination in the Arthur S. Flemming Awards Program. Similar employees of the Library of Congress, the General Accounting Office, Office of the Architect of the Capitol, the Government Printing Office, the Administrative Office of the U.S. Courts, and the Botanic Garden are also eligible. Nominees may include employees in departmental headquarters, regional or field offices or military installations throughout the world.

General Information

Ten separate awards are made. Five awards are in scientific or technical fields, and five in administrative or executive fields.

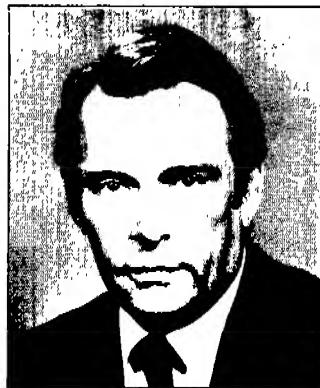

The award recipients are chosen by a panel of distinguished, nationally prominent judges. Each award winner receives suitably engraved awards. Awards are presented at the Arthur S. Flemming Awards Program in Washington, D.C.

The Office of Personnel Management has enthusiastically supported and assisted the Commission and the Jaycees in the furtherance of this Program.

ADDRESS

PRESENTATION OF AWARDS Dr. Arthur S. Flemming

Honorees

ADMINISTRATIVE DIVISION

Judith Kammins Albietz
Bureau of Land Management,
Anchorage, Alaska

For her outstanding achievement in administration during the past two years in implementing a historic congressional land settlement with Native Americans, the Alaska Native Claims Settlement Act (ANCSA).

Over that period, as Chief of the ANCSA Division within the Alaska office of the Bureau of Land Management, she managed the efforts of 65 persons and coordinated with countless others to transfer 13 million acres of land to 60 Eskimo, Indian, and Aleut corporations. This required adjudication of rights and interests in an area equivalent to about twice the size of the state of Maryland. The land conveyed was more than three times the acreage conveyed, before her arrival, over the preceding four years.

She assumed the leadership of a newly organized division in an agency new to her and she established effective working relationships with other managers whose activities and policies would affect the expeditious transfer of land. She promptly formulated proposals for resolution of policy issues consistent with general land laws. She planned and monitored a schedule of several hundred actions whose timely accomplishment was required. She stayed well within her budget, but substantially exceeded the Secretary of Interior's goal.

Kenneth P. Boehne
U.S. Railroad Retirement Board,
Chicago, Illinois

For his superior performance, both individually and in managing others, and his dedication, determination, and sense of urgency in improving the operations of the U.S. Railroad Retirement Board, the Board's service to its clients, and the financial condition of the railroad retirement program. Mr. Boehne's efforts have resulted in significant accomplishments in areas of great concern to the President, the Congress, and the general public. Specifically, during the past 17 months, Mr. Boehne built an effective internal audit organization at the Board from ground up. He directed reviews of significant scope and impact. One such review was of the Board's organizational structure. In a 240-page report, he recommended numerous alternative solutions to problems identified. He designed a follow-up system to ensure that prompt, proper, and complete corrective actions have been taken on audit recommendations. In directing the Board's information collection management program, he reduced the paperwork burden the Board places on the public by about 1 percent in 1980. He directed cash management reviews at the Board that have resulted in \$150,000 of savings and could result in an additional \$9.4 million in one-time savings and a recurring increased investment income of more than \$7 million. He prepared a report which presented alternative approaches for Board management to consider in implementing the debt collection standards set by the U.S. General Accounting Office and the U.S. Department of Justice. In 1979, he was involved in the investigation of the Board's investment program which resulted in a new agreement increasing by \$50 million the Board's investment income.

Ronnie Davis
Department of Housing and
Urban Development
San Francisco, California

For his remarkable managerial ability demonstrated in his recent modernization of the Accounting function of a regional office. Through Mr. Davis's innovative modern technique, he formulated an office staff into an inspired, dedicated, creative group of employees that increased productivity and reversed an outdated bookkeeping operation into a respected financial management system.

This exceptional leader is able to accomplish his missions because of his high personal standard of excellence, his unwavering commitment to the Department's goals, and an expressed ability to encourage his staff to perform with ingenuity and creativity. Mr. Davis never loses sight of his commitment to equal employment opportunities, upward mobility of his employees and other special emphasis programs of the Department in achieving his management goals. The methods and procedures he implemented through his management techniques, accomplished extraordinary results.

Colonel Leslie G. Denend
United States Air Force,
The Pentagon
Washington, D. C.

For his outstanding contribution to the effective functioning of the National Security Council in coordinating U.S. foreign, intelligence and defense policy making, for the breadth of his technical and substantive knowledge as instructor of pilot training and professor of economics at the Air Force Academy and as NSC staff member, for his quality of leadership as an officer of the U.S. Air Force, and for his personal interest and profound involvement in community activities, Colonel Leslie G. Denend was selected to receive this Award.

Special recognition from Mrs. Rosalynn Carter for assistance in her work with Cambodian refugees is only one reflection of his typical concern for others.

Commander Alan M. Steinman
U.S. Public Health Service, Coast Guard
Washington, D. C.

For demonstrating exceptional professional competence while serving with the United States Coast Guard. He developed the curriculum for the Coast Guard Emergency Medical Technician School, trained the necessary personnel, and developed appropriate equipment and medical evacuation data collection methodologies in support of the Coast Guard lifesaving mission. He served as Chairman of the Hypothermia Work Group at Coast Guard Headquarters, establishing a service-wide response to accidental hypothermia encountered in Coast Guard operations, advising the Commandant on protective clothing for Coast Guard personnel, and serving as the Coast Guard spokesman in the field. As the flight surgeon advisor to Coast Guard aviation programs, Commander Steinman co-designed the Underwater Escape Rebreathing device for use by aircrew personnel trapped inside of ditched, submerged, inverted aircraft. He also functioned as medical advisor to the Coast Guard Headquarters Search and Rescue Division. In this position, he effected modifications in Coast Guard rescue craft to permit more rapid recovery of injured people and to provide emergency medical care while on board rescue crafts. He also developed a method for the performance of cardiopulmonary resuscitation on near-drowning victims while still in the water.

Honorees

**SCIENTIFIC
DIVISION**

Bruce A. Banks
NASA, Lewis Research Center,
Cleveland, Ohio

For his outstanding achievement as a research scientist in developing a program applying NASA space technology for the direct benefit of mankind in biomedical devices. His research demonstrated that materials whose surfaces were modified by exposure to the beam of an ion thruster, originally developed for spacecraft propulsion, produced markedly different and more favorable response when implanted in body tissues. This research permitted the creation of a broad spectrum of biocompatible mechanical devices for human application. Laboratory tests are on-going to evaluate percutaneous connectors, left ventricle assist pumps, artificial artery material, and many others, all treated with the ion beam to promote tissue ingrowth and enhance biocompatibility.

Mr. Banks has also contributed his talents to his community especially in his work with young people.

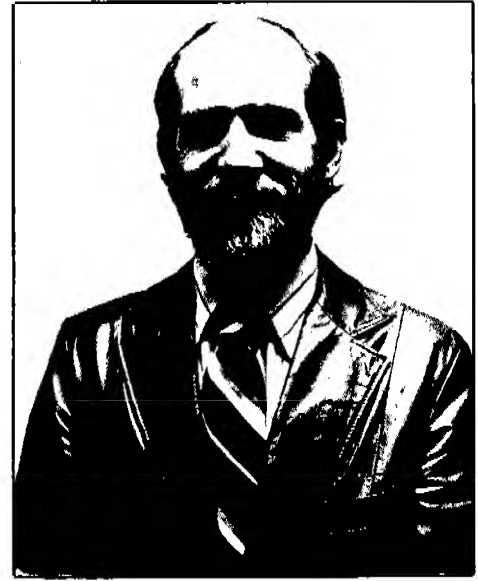

Dr. George Khoury
Health & Human Services,
National Cancer Institute, NIH
Bethesda, Maryland

For his scientific insight, originality, and technical excellence in research on the molecular mechanisms which underlie the induction of cancer by DNA tumor viruses; for his pioneering discoveries of the ways in which cells copy and splice genetic information; for his studies on the use of viruses to package biologically important normal genes and to transfer them to eukaryotic cells; and for his achievements in helping to attain the goals of the National Cancer Program.

Michael Jay Brownstein
Health and Human Services, NIMH
Bethesda, Maryland

For his outstanding contributions to neuroscience, specifically his development of techniques for microdissection of brain and the biochemical localization of specific substances in these tiny pieces of tissue; his research on the mechanisms involved in the wide variation between day and night of the secretory activity of the pineal gland; and his investigations of biologically-active peptides, their formation, distribution and neuroendocrine functions in the brain.

Thomas Mark Buchanan
Health & Human Services
U.S. Public Health Service Hospital,
Seattle, Washington

For his outstanding accomplishments as a research scientist in immunology, Dr. Thomas Buchanan has applied his research talents to discover the virulent and immunogenic factors of the *Neisseria gonorrhoeae* cell wall. He is well on the way to developing an effective vaccine for this ubiquitous organism. The merits of such a vaccine are great in view of the epidemic proportions of gonorrhea, and the morbidity and mortality that it causes.

Dr. William F. Ballhaus, Jr.
NASA, Ames Research Center,
Moffett Field, California

For his outstanding achievement as a research scientist in initiating and advancing computational fluid dynamic methods as a practical tool for improving designs of transonic aircraft through development of applicable and efficient numerical methods and computer codes, and through recognizing their future capability and significance to the aeronautical community. Apart from the importance of this technical contribution to the scientific archives, Dr. Ballhaus has played a major role in the increasing acceptance of computational fluid dynamic methods as an effective and low-cost tool for improving aircraft design. Due to his efforts in fostering the implementation of his codes, new designs, redesigns, and modifications to existing aircraft have been accomplished at savings of literally millions of dollars to the government and the aerospace industry.
